

Wascomat Dual-Use Wetclean Systems

Drycleaners: Install the environmentally-safe Wascomat Wetclean System for cleaner, brighter and softer garments - and reduce your operating costs!

TD67 RVRMC

TD Series Wetclean Dryer models. Available in 35, 67, 83, 100 and 135 lb. capacities.

SU645 CA

200 G-Force Extract, Solid-Mount SU series. Available in 45 lb. capacity.

EXSM665 CA

300 G-Force Extract, Solid-Mount EXSM Wetclean models. Available in 65 and 80 lb. capacities.

EX660 CA

350 G-Force Extract, Soft-Mount EX Wetclean models. Available in 45, 60, and 75 lb. capacities.

Wetcleaning Washers:

- Feature a special 2 gallon sump which allows for complete mixture with shrinkage resistant additives prior to exposure to the garments.
- Steam heated with precise temperature control for long soaks for the most stubborn stain removal.
- Program to the exact water levels and exact wash and extraction speeds.
- Run laundry programs as well to do shirts, comforters, sleeping bags and bachelor bundles. Even an overnight soak!

Wetcleaning Dryers:

- Feature standard steam heat, reversing cylinder and RMC.

A smart addition to traditional drycleaning methods, Wascomat dual-use Wetclean Systems are an environmentally safe, non-polluting alternative to perc. With the push of a button, the Wascomat wetcleaner converts to an ideal washer for laundering shirts, comforters, drapes and "wash-dry-fold" laundry. Call Wascomat today for more information.

Clarus® Control

Wascomat's "Dual-use" Wetclean washers are equipped with Clarus® Control for easy programming and superior cleaning results. Programmable Memory Card can be used to start or install programs created on your computer or on the control panel.

Clarus® manages wetcleaning and laundry washing processes by precisely controlling all important functions including water temperatures and levels, extract speed, and cleaning and wash cycle times.

When laundry means business.

Custom Programs are Simple

Automatic and easy to program Clarus® microprocessor control lets you create up to 192 custom laundry and wetcleaning wash programs and controls 8 individual trigger signals for liquid and powder supply injection.

All programs can easily be entered on the Clarus® Control panel on the front of the machine.

Refer installation and servicing to qualified, licensed personnel. Always read installation and operating manuals and consult local codes before installation. Protect machines with properly rated, inverse-time, common-trip, industrial-type circuit breakers ONLY. Warranty void if not properly installed. Advise when placing order if dryers are for installation at altitudes in excess of 1000 feet above sea level, as this may require a gas-orifice change. Contact Laundrylux for more information and availability of machines for electric services not listed. Specifications subject to change without notice. Laundrylux assumes no responsibility for errors or omissions in this information.

Residual Moisture Control

Wascomat's Wetclean TD Dryers include our exclusive, accurate and fully-automatic Residual Moisture Control (RMC) system.

RMC prevents damage to garments caused by overdrying and reduces lint and wrinkles by automatically stopping the dryer when the exact pre-set moisture level is reached. The amount of residual moisture in the fabric is important for proper finishing.

Call today for information on the full line of Wascomat washers, dryers, ironers, and low-cost financing & leasing.
